## ABOUT ME

Driven by an infectious enthusiasm and unwavering determination, I am a seasoned professional with over fifteen years of experience, adept at steering projects to success while maintaining a positive atmosphere. My expertise in Microsoft Cloud technologies, particularly in PowerPlatform and Dynamics 365, positions me as a specialist capable of providing comprehensive support that encompasses both technical and functional requirements. I am keen to apply my skills to your organization, offering my proficiency for either short-term collaborations or long-term partnerships. I am excited about the prospect of contributing to your team's achievements and am looking forward to discussing how my expertise can benefit your initiatives.

## WORK EXPERIENCE

**IBM**  
Remote - Paris  
Feb 2026 - Present

### Dynamics CRM & PowerPlatform Technical Consultant

- Designed and analyzed technology solutions on Microsoft Power Platform, including Power Apps and Power Automate, to address complex business requirements
- Managed and optimized offline capabilities for Power Apps Canvas and Model-driven applications to support user adoption and continuity of operations
- Developed, configured, and deployed Canvas and Model-driven applications with a strong focus on solution quality, reliability, and performance
- Provided technical leadership and guidance to support the upskilling of developers, fostering best practices and knowledge sharing within an international team context

**TALAN**  
Remote - Paris  
Jul 2025 - Jan 2026

### Dynamics CRM & PowerPlatform Technical Consultant

- Configured advanced Dynamics 365 settings, including data models, forms, and views, for clients in the cultural and mutual insurance sectors.
- Developed C# plugins and Custom Workflow Activities (CWAs) that integrate third-party APIs to automate and enhance business processes.
- Designed and maintained complex Power Automate flows, seamlessly integrating them with custom actions in Dynamics.
- Managed Azure environments, including virtual machines, App Registrations (Azure AD), Azure Blob Storage, and DevOps pipelines.
- Orchestrated automated data flows between business tools by integrating Dynamics with Talend.
- Customized Power Pages portals and automated high-volume processes using PowerShell scripts.

**GROUPE IDEA - FREELANCE**  
Saint-Nazaire  
Nov 2024 - Apr 2025

### PowerPlatform TechLead

- Designed and analyzed technological solutions on Power Platform, including Power Automate and Power Apps, to meet business requirements.
- Developed and deployed both Canvas and Model-Driven applications, ensuring high quality and performance standards.
- Implemented governance strategies for Power Platform to ensure compliance and security of solutions.
- Managed the full lifecycle of Power Platform applications from design to ongoing maintenance.
- Integrated Power Platform with Talend and various business tools to optimize processes and data flows.
- Provided technical leadership and supported skill development of Makers within the team, fostering autonomy and innovation.

**APSIA - FREELANCE**  
Remote - Paris  
Nov 2020 - Feb 2023

### PowerPlatform Tech Lead

- Designed and deployed a B2B portal using PowerApps Portal, integrated with Dynamics 365 F&O, serving an audience of over 10,000 users
- Served as a technical reference for Business Analyst teams, providing expertise and strategic guidance
- Managed workload estimations and capacity planning for project delivery
- Developed Power Pages for a multilingual portal, including backend plugins in C#
- Implemented Power Automate for database process automation and action execution
- Managed Dataverse for data synchronization with Dynamics Finance and Operations in a multi-tenant environment using Dataflow
- Created and integrated custom Power BI reports within the portal
- Proficient in web technologies such as HTML, JavaScript, Bootstrap, and Semantic UI to enhance user experience on the portal

**SIUM - FREELANCE**  
Challans  
Mar 2020 - Nov 2022

### Microsoft Collaborative Solutions Consultant

- Demonstrated deep expertise in implementing and optimizing Microsoft 365, including Teams, SharePoint Online, PowerApps, PowerAutomate, and PowerBI to enhance collaboration and operational efficiency.
- Managed comprehensive migration projects to SharePoint 2013/2016/2019 on-premises, ensuring seamless data transition and user training.
- Developed customized solutions on Dynamics 365 on-premises to meet client-specific needs in customer relationship management (CRM) and enterprise resource planning (ERP).
- Designed robust SQL Server database architectures, upholding data integrity, performance, and security.
- Created interactive dashboards and reports using PowerBI to support strategic decision-making through advanced data analysis.

**SONCEBOZ**  
Sonceboz (CH)  
Jan 2017 - Feb 2020

### IT Business Analyst

- Led IT project management for application integration and development, ensuring alignment with corporate strategic objectives.
- Conducted in-depth user needs analysis to recommend relevant functional and technical improvements.
- Expertly administered SQL Server environments (versions 2008 to 2017), including installation, performance optimization, and routine maintenance.
- Designed and developed Industry 4.0 mobile applications using React.js and SAP UI5 through Neptune, meeting mobility and innovation requirements.
- Created custom SharePoint tools, including workflows, forms, and applications, utilizing SharePoint Designer and Visual Studio.
- Developed detailed and visual reports with SSRS and PowerBI to support data-driven decision-making.
- Managed updates and development on Microsoft Dynamics CRM for a user community of 100, enhancing business process efficiency.
- Configured, deployed and maintained Resco Mobile CRM application to enable a continuous Dynamics CRM usage, including offline scenarios such as flight without Wi-Fi.
- Led the migration from Microsoft Dynamics CRM 2015 to Microsoft Dynamics 365 on-premises, ensuring a smooth and uninterrupted service transition.
- Performed proactive maintenance of the SharePoint farm for 500 users, ensuring high system availability and optimal performance.
- Designed and delivered internal training on SharePoint and CRM, strengthening team skills and promoting user adoption of tools.

**SONCEBOZ**  
Sonceboz (CH)  
Sep 2014 - Dec 2016

### SharePoint Project Manager

- Managed SharePoint project initiatives, including the upgrade and maintenance of a SharePoint farm serving 500 users
- Designed and developed custom SharePoint tools such as workflows, forms, and applications using SharePoint Designer and Visual Studio
- Oversaw updates and enhancements for Microsoft Dynamics CRM 2015 for a user base of 100
- Ensured operational maintenance of the SharePoint farm, maintaining performance and availability for users
- Conducted SharePoint and CRM training sessions to enhance user skills and optimize platform utilization

**OLEAP**  
La Chapelle Sur Erdre  
Apr 2012 - Aug 2014

### BI Consultant / SharePoint Development Engineer

- Designed and deployed SQL Server BI decision-making solutions for the agro-food and industrial sectors, including cube and report creation.
- Managed data structuring within Data Warehouses to meet organizational challenges.
- Developed custom business applications in .NET (Web and Windows Forms) and on the SharePoint platform.
- Implemented a serialization system for license management and tracking of marketed Oléap modules.
- Conducted training sessions for clients on Business Intelligence tools and developed applications.

**EXAKIS**  
Nantes  
Jul 2011 - Mar 2012

### SharePoint Engineer

- Conducted in-depth analysis of business requirements for the development of customized SharePoint Sandbox solutions tailored to the industrial sector.
- Designed and deployed custom C# solutions on SharePoint 2010, ensuring compliance with industry performance and security standards.
- Developed integrated C# (ASP.Net) modules for Exchange Server 2010 to enhance collaboration and communication within the banking sector.

**ESPACE TECHNOLOGIE**  
Challans  
Jun 2008 - Oct 2008

### SharePoint Trainee

- Conducted thorough analysis of company's functional and technical requirements for collaboration and document management
- Researched and synthesized key features of Microsoft SharePoint to align the platform with internal requirements
- Deployed and configured SharePoint portal to enhance collaborative work processes
- Provided technical support and problem resolution for end-users of Microsoft Office SharePoint Server 2007
